

Nurses feel the heat

Author(s):	Douglas K
Year:	2014
Journal:	Australian Nursing & Midwifery Journal. 21 (7): 20-24

Abstract:

When a natural, disaster strikes, nurses are among those on the ground providing front line support. They are caring for their patients, providing medical and emotional support, while also dealing with dramatically increased workloads, reduced resources and the fear and uncertainty over what is happening to their own home and family. Kara Douglas examines the impacts of climate change on nurses, health care and the community.

Resource Description

Exposure :

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Global or Unspecified

Health Impact:

specification of health effect or disease related to climate change exposure

General Health Impact

Medical Community Engagement:

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

Resource Type:

Climate Change and Human Health Literature Portal

format or standard characteristic of resource

Policy/Opinion

Timescale: 

time period studied

Time Scale Unspecified
